

The University of Notre Dame Australia uses an encrypted wireless network, to ensure that all information is protected.

To access the wireless network, you must have an active staff or student username and password. Access to the university Wi-Fi is granted under the same policies as accessing our wired network.

1. Ensure your wireless switch is enabled; this is usually a physical switch or button on your laptop or a software switch invoked by the Function (Fn) key.
2. Click the *Wireless Network* icon on the system tray.
3. Choose the **UNDA-WiFi**
4. Check **Connect Automatically**
5. Click **Connect**

6. When prompted, enter your **Notre Dame Staff/Student ID**  
*e.g. 32001234 for students or 31001234 for staff*
7. Enter your **password**  
*This is the same password to log onto a campus computer*

8. Click **Accept** to the *Trust Certificate*  
If the authentication is successful, the UNDA-WiFi network shows as connected.

If you have any issues connecting to the wireless network, try manually creating a network profile, to do this complete the following steps.

1. Click on the **wireless icon**  
*located near the right-hand side of the taskbar (near the clock)*
2. Select **Open Network and Sharing Centre**

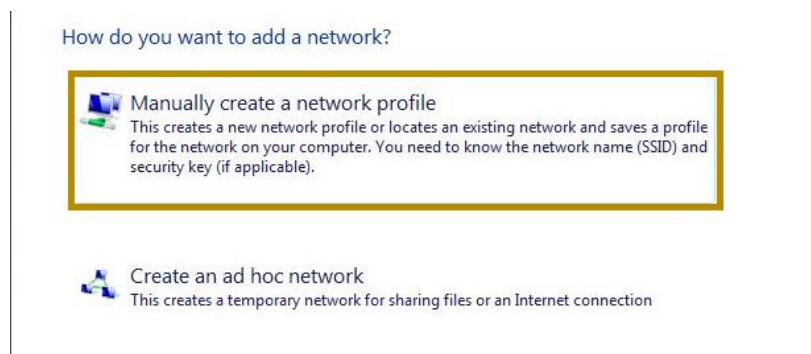

3. Select **Manage wireless networks**
4. Click **Set up a new connection or network**

3. Select **Add**
4. Select **Manually create a network profile**

5. Enter the details  
**Network Name:** UNDA-WiFi  
**Security Type:** WPA2-Enterprise  
**Encryption Type:** AES
6. Untick **Start this connection automatically**
7. Click **Next**

Enter information for the wireless network you want to add

Network name:

Security type:

Encryption type:

Security Key:  ☒ Hide characters

☒ Start this connection automatically

☐ Connect even if the network is not broadcasting

Warning: If you select this option, your computer's privacy might be at risk.

8. Click on **Change connection settings**

9. Untick **“Connect automatically”** and Tick **“Connect even if the network is not broadcasting”** as shown below, and click **“OK.”**

The screenshot shows the 'Security' tab of the Windows Network Setup window. The 'Name' and 'SSID' are both 'UNDA-WIFI', and the 'Network type' is 'Access point'. The 'Network availability' is set to 'All users'. Three checkboxes are visible: 'Connect automatically when this network is in range' (unchecked), 'Connect to a more preferred network if available' (unchecked), and 'Connect even if the network is not broadcasting its name (SSID)' (checked). The first and third checkboxes are circled in yellow.

10. Open **“Security”** tab, and Click the **“Settings”**.

The screenshot shows the 'Security' tab of the Windows Network Setup window. The 'Security type' is 'WPA2-Enterprise' and the 'Encryption type' is 'AES'. Under 'Choose a network authentication method', 'Microsoft: Protected EAP (PEAP)' is selected, and the 'Settings' button next to it is circled in yellow. The 'Remember my credentials for this connection each time I'm logged on' checkbox is checked.

11. Untick **Validate server certificate**

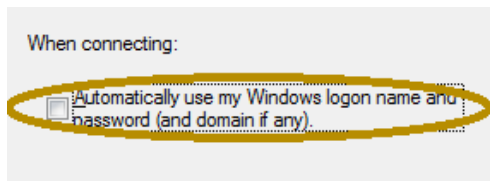

12. Click **Configure**

The screenshot shows the 'Security' tab of the Windows Network Setup window. Under 'When connecting:', the 'Validate server certificate' checkbox is unchecked and circled in yellow. Below it, the 'Connect to these servers:' checkbox is unchecked. The 'Trusted Root Certification Authorities' list is visible, with 'AddTrust External CA Root' selected. The 'Do not prompt user to authorize new servers or trusted certification authorities.' checkbox is unchecked. Under 'Select Authentication Method:', 'Secured password (EAP-MSCHAP v2)' is selected, and the 'Configure...' button next to it is circled in yellow. The 'Enable Fast Reconnect' checkbox is checked, and the 'Enable Identity Privacy' checkbox is unchecked. The 'OK' and 'Cancel' buttons are at the bottom.

11. Untick **Automatically use my Windows login name and password**

12. Click **OK** until you have closed out each window.

1. Click the *Wireless Network* icon on the system tray.
2. Choose the **UNDA-WiFi**
3. Check **Connect Automatically**
4. Click **Connect**

5. When prompted, enter your **Notre Dame Staff/Student ID**  
*e.g. 32001234 for students or 31001234 for staff*
6. Enter your **password**  
*This is the same password to log onto a campus computer*

7. Click **Accept** to the *Trust Certificate*  
If the authentication is successful, the UNDA-WiFi network shows as connected.

Please kindly contact your campus Service Desk if you require assistance.
